Glass Collection

Glass is the language through which we converse with light.

Handcrafted
Beauty

Capturing
Light

Timeless
Warmth

We cherish every delicate bubble and subtle irregularity in texture — not as flaws, but as traces of handcrafted warmth, the very imprints that breathe life into the material.

Since 1994, we have inherited the Italian Murano technique, capturing life as a tangle of memory. Glass is the poet of light, a vessel for emotion. We believe the soul of a lamp lies half in the light itself, and half in the form that carries it.

With glass, we hold light, with light, we warm life.

Alabaster Collection

Light lies within stone, and art reveals itself through light.

We delve into the world's rare mineral veins, selecting natural alabaster formed over eons of geological evolution. Each vein is Earth's unique signature. The ultimate luxury lies in reverting the inherent nature of the material. When light meets the warm textured surface of alabaster, it becomes the breath and emotion of a space.

Through dozens of precise processes, we allow modern craftsmanship to interpret the language of alabaster, guiding light to diffuse gently within, revealing soft, dawn-like layers of illumination. Each lamp is an irreplicable work of art, born from the collaboration between nature and human ingenuity.

Bring the profound and elegant vitality of alabaster to reside in your space.
